

2020 RACT vehicle ownership costs

2020 | RACT vehicle ownership costs

Introduction

This Schedule is a guide to the average cost of owning and operating vehicles for private purposes. It is based on typical vehicles in various sizes available in Australia and provides an indication of the likely areas of regular out-of-pocket expense. The tables provide costings for 79 vehicles. Models are generally chosen from the top selling vehicles in each class.

All costs used in these calculations were current at the time of compilation.

A number of diesel and hybrid sedan and hatch models, and a selection of electric vehicles have also been included.

The costings are indicative only for comparison purposes, and not necessarily an indicator of actual costs. Any deviation from the assumptions or values used in the calculations will change the actual cost of owning and operating the vehicle.

Please note that individual cost elements are shown in the tables as average dollars per month. The totals are shown as total dollars per month, total dollars annually, and total dollars over 5 years. The residual value is also shown at the end of the costing period and also represents the owner's acquired equity in the vehicle given the full purchase price was borrowed and repaid. The difference between this and the purchase price is the amount effectively lost to depreciation.

Calculation periods and distances

Private Motoring

Calculations have been made for an annual distance of 15,000km in line with Australian Bureau of Statistics surveys of Australian vehicle use. They are based on buying a new vehicle and operating it for 5 years.

Residual Values

The residual values shown are sourced for each model from reputable pricing and vehicle data guides. The difference between this and the initial purchase price is the amount lost to depreciation during the costing period.

List prices or manufacturer's National on-going drive away price offers, where applicable, were current at the time of compilation. The estimated on-road price includes average dealer delivery fees as surveyed by us for each brand, plus registration and other statutory fees and charges.

Loan Repayment

We have assumed 100% of the total cost (including statutory and other on-road costs) of the new vehicles has been financed. The loan through RACT Finance is secured, has a 5-year term with monthly repayments and an assumed market-competitive comparison interest rate of 6.39 % which takes account of fees and charges to establish and maintain the loan. The loan is fully repaid at the end of the period.

RACT Finance details shown are indicative only; actual rates, terms, conditions and fees may vary.

Registration and Insurance

Registration costs, Tasmanian Motor Tax, other statutory fees and levies, and Compulsory Third Party insurance costs are included and current as at 1st July 2020.

RACT comprehensive insurance rates are based on the assumption that the driver is 30 years of age, carries a basic excess, a rating 1 for life, no under 25 drivers, the car will be garaged at an average risk postcode, the vehicle is financially encumbered and that market value cover applies. Rates are for private use. The premiums for a male and female driver have been averaged.

The average running costs shown in the '2020 RACT vehicle ownership average costs' table are developed from the averages for the combined vehicles in the respective categories as listed in this fact sheet's 'New to 5 years' ownership cost tables.

2020 RACT vehicle ownership average costs		
Vehicle category	Average monthly cost	Average annual cost
Light cars	\$ 714.52	\$ 8,574.27
Small cars	\$ 880.17	\$ 10,562.01
Medium cars	\$ 1,117.82	\$13,413.88
People movers	\$ 1,306.38	\$ 15,676.51
Electric	\$ 1,400.01	\$ 16,800.08
SUV small	\$ 923.94	\$ 11,087.33
SUV medium	\$ 1,186.53	\$ 14,238.41
SUV large	\$ 1,393.11	\$ 16,717.33
All terrain	\$ 1,749.06	\$ 21,013.41
Light commercial 4x2	\$ 1,307.09	\$ 15,685.04
Light commercial 4x4	\$ 1,536.43	\$ 18,437.14

Fuel

Fuel costs of 145.0 cents/litre (ULP), 153.0 cents/litre (95PULP), 156.0 cents/litre (diesel) are based on the average of Tasmanian metro and regional centres for calendar year 2019.

Fuel consumption data was based on the Australian Design Rule 81/01 standard fuel consumption test.

For the electric vehicles, the domestic electricity tariff of 26.40 cents/kWh has been used and official power consumption as provided by the manufacturer. In the case of hybrid vehicles which combine electric and petrol engine technologies, the domestic electricity tariff and appropriate petrol costs and official fuel consumption have been used.

Tyres and Battery

We assume a replacement set of four tyres will be required during the calculation period.

Replacement costs include fitting and balancing in conjunction with replacing the four tyres. Costs are at retail pricing. Tyre selection is based on the most suitable replacement for the original equipment branded tyre or a tyre of equivalent specification of a different brand suitable for the vehicle.

A replacement battery and fitting is included in the costing period for most vehicles.

Service and Repairs

Maintenance costs include dealer servicing according to the manufacturer's schedule.

Where a manufacturer offers capped price servicing, this has been factored into our costings. With certain makes and models we use their service inclusive program which is a one-off payment that covers servicing for an elected period of time. Where a maker's capped price servicing arrangements expire earlier than our five-year calculation period, servicing reverts back to normal maker's schedule at appropriate rates.
