## **Bridgewater Bridge**

The RACT has welcomed today's positive announcement regarding the Bridgewater Bridge.

RACT Chief Member Experience Officer Stacey Pennicott said that this announcement had been many years in the making.

"This is a major project and it's vitally important that the Government gets it right. We look forward to further discussions about the preferred designs to ensure the Bridge will reduce congestion while ensuring road safety is maximised.

"While the Bridgewater Bridge replacement has been subject to significant delays, we look forward to the project progressing and seeing the first stages of development commence at the earliest opportunity."
