RACT welcomes West Tamar announcement

The RACT has welcomed today's announcement that upgrades to the West Tamar highway will commence shortly.

RACT Group CEO, Mark Mugnaioni, said members had been calling for the Government to fast track investment.

"It's great to see the Government taking on board the feedback of our members. The upgrades will better connect a number of communities and make the highway safer for motorists," Mr Mugnaioni said.

"We also welcome the news that tenders have been called to upgrade a notorious section of the Bass Highway near Boat Harbour.

"Both of these projects were part of our list of five projects that we have been calling on the Government to fast track. We will continue to work with the Government to ensure that the other projects included on our list are delivered as soon as possible."
